Subject Index Vol. 76, 2002

Neuro
endocrinology

Activator protein-2 111
Adrenal gland 137
– splanchnic innervation 79
– steroid receptors 158, 243
– steroids 47, 63, 79, 137, 148, 158, 243, 366, 390
Adrenalectomy 185
Adrenocorticotropin *see* Corticotropin
Aging 121
Alcohol exposure 185
Amino acid decarboxylase 148
γ-Aminobutyric acid 170, 193, 283, 290
– – antagonists 193
– – receptors 93, 170
Amphibian(s) 18, 55
Amygdala 63
Angiotensin receptors 137
Antidepressants 348
Apoptosis 223, 272
Arcuate nucleus 1, 93, 121, 316
Aromatase 297
Astrocytes 121
Autoradiography 235

Bax 272
Bed nucleus striae terminalis 297
Bisphenol 223
Body temperature 185

$[Ca^{2+}]_i$ oscillations 99
Calcitonin gene-related peptide 79
Calcium 325
cAMP 79, 325
– response element binding protein 111
Castration 290
Catecholamine(s) 18, 35, 137, 148, 178, 214, 254, 373
– receptors 214
Caudate putamen 235
Cell proliferation 366
Cerebrospinal fluid 373
Circadian rhythm 366
Clinical neuroendocrinology 254
Cortex 267
Corticotropin 47, 63, 70, 79, 137, 158, 243, 348, 390
Corticotropin-releasing hormone 35, 47, 70, 158
Cushing syndrome 390
Cytokines 1

Dehydration 111, 243, 254
Dentate gyrus 366
Development 93
Diabetes 357
Dihydroxyphenylacetic acid 148
Dihydroxyphenylalanine 148

Energy balance 178
Estrous cycle 272, 283

Fetal differentiation 185
– neuroendocrinology 47
Fever 185
Fishes 8, 325
Food deprivation 243
– intake behaviour 131

G proteins 235
Galanin-like peptide 131
GC cell line 99
GH3 cell line 170
Ghrelin 131, 316, 390
Glial fibrillary acid protein 121
Glutamate 223
Gonadal hormones 357
– steroid antagonists 223
– – receptors 1, 203, 223, 267, 283, 297
– steroids 1, 8, 18, 28, 35, 121, 203, 214, 223, 235, 267, 272, 283, 290, 297, 339, 348
Gonadotropes 272
Gonadotropin(s) 121, 131, 203, 283, 290, 357
Gonadotropin-releasing hormone 1, 193, 203, 272, 283, 290, 357
Growth hormone 8, 93, 99, 131, 170, 316, 325, 390
– hormone-releasing hormone 93, 390

Hamster 35, 178
Heart rate 158
Hippocampus 223, 243, 267, 339
Homovanillic acid 148
Hypercapnia 381
Hypertension 254
Hypothalamopituitary-adrenal axis 70
Hypoxia 381

Immunocytochemistry 18, 35, 223, 357
In situ hybridization 93, 121
Insulin 131, 357
Interleukins 185

Leptin 131

Metabolism 131, 381
Mice 93, 381
Molecular neuroendocrinology 8, 55, 297

Neonatal imprinting 158, 243
Neuroimmune interactions 178
Neuronal culture 193
Neuropeptide Y 70, 131, 316, 373
Nitric oxide synthase 79
Nucleus accumbens 148

Olfactory placode 193
Opiate peptides 55, 235
Opioid peptide antagonists 235
– – receptors 235
Osmotic challenge 254
Ovariectomy 121, 214, 348, 357
Ovine 47, 373
Oxytocin 111, 348

Paraventricular nucleus 63, 70, 137, 243, 254, 373
Periventricular nucleus 93
Photoperiod 178
Pituitary adenylate cyclase activating polypeptide 325
Prefrontal cortex 148
Preoptic area 1, 235, 267, 283, 290
– nucleus 297
Prohormone convertases 243
Prolactin 121
Prolactin-releasing peptide 70
Proopiomelanocortin 243
Proteasome 267
Protein kinases 339

Quail 297

Raloxifene 203, 214
Raphe nucleus 63
Renin-angiotensin system 137
Reproduction 18, 131

Selective estrogen receptor modulators 203, 214
Serotonin 35, 63, 339, 348
– agonists 35, 339, 348
– antagonists 28, 35
– receptors 28, 339, 348
Sex behavior 297
– dimorphism 185, 290, 297, 373, 381
Sexual arousal 28
Sleep 131
Somatostatin 8, 93, 99
– antagonists 99
– receptors 99
Somatotropes 99, 170
Splanchnic nerve 79
Spleen 178
Splenic denervation 178
Steroidogenesis 35
Steroidogenic acute regulatory peptide 79
Streptozotocin 357
Stress 137, 158, 185, 373, 381
Striatum 214
Supraoptic nucleus 111, 243, 254

Tamoxifen 203, 214
Testis 35
Thermoregulation 158, 185
Transcription factors 111
Transforming growth factors 1
Transgenics 93
Tyrosine hydroxylase 18, 254

Vasopressin 70, 111, 158, 243, 254
Ventromedial nucleus 121
Vesicular acetylcholine transporter 79
Vomeronasal organ 193

Water deprivation 79, 111

Xenoestrogens 223
